

Penicillium Acti-PlusTM

Penicillium Acti-Plus is an important genus of phylum ascomycota, found in the natural environment and one of the most common fungi found in rhizosphere soil. Penicillium species produce solubilized phosphorus, siderophore, and phytohormones such as indole acetic acid and gibberellic acid, which are important for plant health.

Liquid Application:

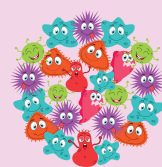

- Dilute 10g in L of chlorine-free water (1:100 dilution)
- Water it on the ground or spray it on the tree
- Repeat application every 2-4 weeks to maintain good population of *Penicillium sp.* in the field.

Product Composition:

<i>Penicillium sp.</i>	: 0.1 wt %
Talc	: 99.9 wt %

Product Quality:

CFU $\geq 1.0 \times 10^6$ CFU per gram

Soil/ Compost Application:

- Mix 100g of product powder in 10kg of soil/compost.
- Plow/sow on crop area, add with liquid application or compost every 2-4 weeks.
